World Map

Geography: Australia

Vocabulary	
Australia	One of the seven continents.
Territory	Land which is controlled by a particular country.
States	The population of an area under a single government.
Capital city	A city where the governments central meeting place is.
Degrees Celsius	A unit of temperature, to see how hot or cold something is.

Australia

Australia is one of the largest countries on Earth, and the only country that covers an entire continent. The capital city of Australia is Canberra.
Australia is split into 6 states: Western Australia, Northern Territory, Queensland, New South Wales, South Australia and Victoria.
The weather is very different to the UK.
