

Year 5 and 6 Homework Grids focus on the core areas of learning – reading, spelling, grammar, times- tables and number facts, as a thorough knowledge of these subjects provides the foundations of the primary curriculum.

A homework grid will be issued half termly, containing activities that need to be completed each week for example: reading, spellings, Mathematics.

Additional pieces will be given out as and when needed during the term. These pieces of work will be linked to specific elements of the curriculum; they will support learning and will be used in class during lessons.

As a church school we recognise the importance of taking care of our neighbours, consequently each half-term a specific act (act of random kindness) will be suggested for your child to carry out.
